

Microsoft Foundry Prompt Evaluations

Lab Name

Evaluation Flow Setup

Platform

Microsoft Foundry

1. Lab Overview

In this lab, we evaluate the quality, reliability, and safety of generative AI responses in Microsoft Foundry using dataset-based evaluation.

2. Main Objective

The main objective of this lab is to help learners understand how dataset evaluation is used to measure whether AI responses are relevant, coherent, safe, and suitable before using the solution in a real-world or production scenario.

3. What Learners Will Learn

- Understand why evaluation is required for generative AI applications.
- Create a dataset-based evaluation in Microsoft Foundry.
- Select the correct evaluation scope for question-and-answer datasets.
- Verify automated evaluators such as relevance, coherence, and safety checks.
- Review evaluation results and use the scores to improve prompts, datasets, or model configuration.

4. Prerequisites

- Active Azure subscription.
- Access to Microsoft Foundry.
- Permission to use or deploy the required model.
- Prepared JSONL dataset for evaluation.
- Browser access to the Microsoft Foundry portal.

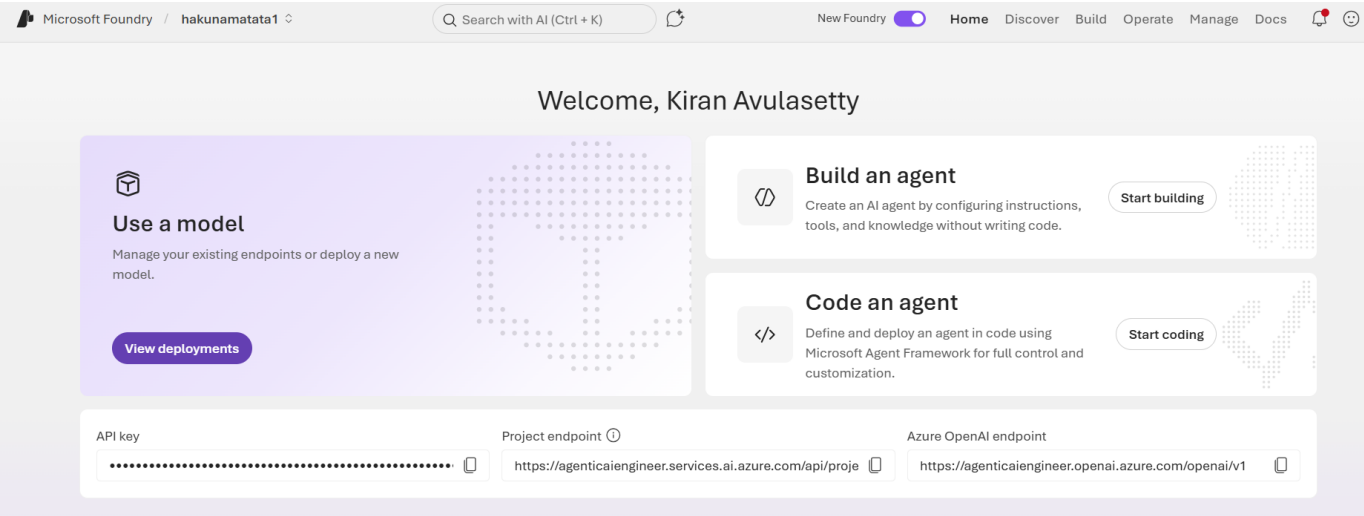

5. Recommended Selection for This Lab

Figure 1: Create new evaluation page showing Individual turns and Full conversations options.

6. Step-by-Step Lab Instructions

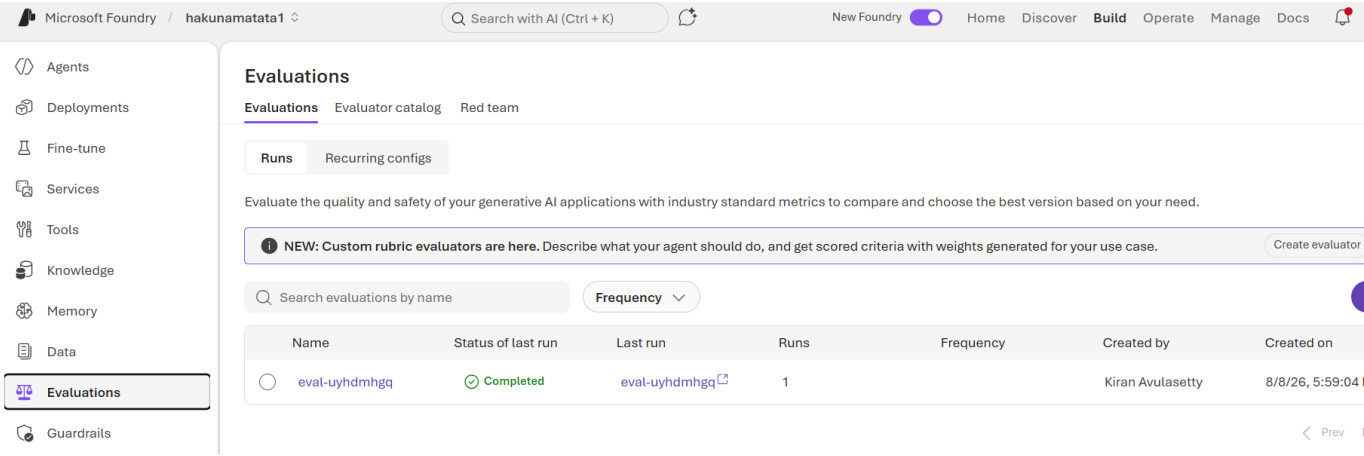

Step 1: Open Azure AI Foundry

- 1. Open Microsoft Edge.
- 2. Go to the Microsoft Foundry portal – https://ai.azure.com /
- 3. Sign in using the provided credentials.
- 4. Select the project -hakunamatata1

Step 2: Go to Evaluation

- 5. From the project page, click on the build tab on top-right menu.
- 6. From the left navigation pane, select Evaluation.

- 7.
- 8. Click on Create to create a new evaluation.

Create new evaluation

1 Target: Dataset

Tell us what you'd like to evaluate.

☐ Agent
Evaluate the quality and safety of an agent

☐ Model
Evaluate the quality and safety of a model deployment

☒ Dataset
Evaluate an existing dataset

Question	ExpectedResponse
What documents are required for international travel?	For international travel, the required documents can vary depending on your destination, nationality, and the purpose of your trip. However, here is a general list of the most commonly required documents for international travel: --- ### 1. **Passport** - A
How can I find the best deals on flights and	Finding the best deals on flights and

16.

Step 3: Select Evaluation Scope

17. In the Scope section, For the current dataset-based lab, select Individual turns. This is suitable when the dataset contains separate question-and-response pairs rather than a complete chat conversation.

Option	Use When	Recommendation
Individual turns	The dataset contains single query-response pairs, such as Question and ExpectedResponse.	Use this for the current lab.
Full conversations	The dataset contains complete multi-turn conversations with multiple back-and-forth messages.	Do not use for the current Q&A dataset unless the data is conversation-based.

← Create new evaluation

✓ Target: Dataset

2 Scope

Select the evaluation scope for this evaluation run.

☒ Individual turns
Evaluate individual query-response pairs or single turns

☐ Full conversations
Evaluate complete multi-turn conversations end-to-end
